## Ocean Signal Launches Survivor Club in new website relaunch

Ocean Signal, the UK's leading manufacturers of satellite and terrestrial emergency beacon technology is thrilled to announce the launch of '[Survivor Club](#)' as part of its newly refreshed website. This dedicated platform allows customers who have previously activated their Ocean Signal beacons to share their life-saving stories and connect with a community of fellow survivors.

Designed to bring together individuals who have used Ocean Signal beacons in emergency situations, customers can share their experiences and invaluable first-hand insights into using the beacons, encouraging others to take precautionary measures and be appropriately equipped for potential

emergencies.

As a special thank you, Ocean Signal offers a replacement beacon to every customer whose story is approved and shared on the 'Survivor Club' platform. This gesture ensures that customers remain equipped with the best safety technology for future adventures.

At Ocean Signal, the team are committed to providing the most reliable safety and survival equipment for mariners, adventurers, and outdoor enthusiasts. The launch of the 'Survivor Club' underscores this commitment, highlighting the importance of its technology through inspiring stories of survival and resilience. It also fosters a supportive network for those who have faced extraordinary challenges, bringing the community together.

Do you have your own story you would like to share? Visit the [Survivor Club](#) here.

Visit the Survivor Club and explore Ocean Signal's full range of products at [www.oceansignal.com](http://www.oceansignal.com)

**KONGSBERG DIGITAL** is an industrial software company shaping the future of work by changing how businesses design, operate, and maintain their assets. Businesses trust us for our innovative carbon capture and storage technology, new energy ventures towards net zero, voyage optimization, emissions reduction, and technology to help balance grids and complex power

systems.☒We are transforming carbon-intensive industries by providing industry-leading solutions that extract value from industrial data. We enable businesses to connect physical assets to an industrial work surface, serving as one common infrastructure for decision-making across the value chain.

Kongsberg Digital holds a prominent position as a premier provider of maritime simulation technology. This technology is widely embraced by maritime research and training centres across the globe, serving as a cornerstone for training both students and crew members. Moreover, it facilitates advanced studies in crucial domains such as human factors, port development, operational verification, digital twins, and the pioneering realm of autonomous shipping operations.
