## Cobham SATCOM: Cobham hosts 'Leadership in Person' keynote speakers at SMM

*Daily maritime communication focused presentations from CIRM, Inmarsat and Intelsat to provide insight into maritime satellite and radio communication*

**Copenhagen, Denmark** – Cobham SATCOM will host a series of 'Leadership in Person' key note presentations from visionary industry leaders on its stand during SMM 2016 (Hall B6 stand 407). The Comité International Radio-Maritime (CIRM), and satellite network operators Inmarsat and Intelsat will

each present on a variety of topics that effect the maritime industry, providing insight on how harnessing the power of modern communication technology and services can support the industry to operate safer, smarter and more effectively.

Cobham SATCOM has chosen two major players to focus on maritime satellite communication. Inmarsat and Intelsat will share insight into the future of the industry and the drivers behind the business – covering topics such as HTS, Fleet Xpress and Intelsat Epic<sup>NG</sup>. CIRM Keynote presentations will focus on the ongoing development and future of the Global Maritime Distress and Safety System (GMDSS), the established emergency communication regulation that Cobham has played a significant part in shaping since its introduction in 1999.

Cobham welcomes SMM attendees to join its Leadership in Person key note presentations, which will take place daily from Tuesday 6<sup>th</sup> September until Thursday 8<sup>th</sup> September. Each presentation is expected to last approximately 15 minutes and includes the opportunity to discuss the issues with the speakers and Cobham SATCOM staff afterwards.

**11:00** – Alex van Knotsenborg, VP Sales EMEA, Inmarsat Maritime

**13:00** – Peter Andersen, Board Member at CIRM

**15:00** – Chris Insall, Senior Product Manager Maritime Services / Andrew Faiola, Director Mobility Solutions, Intelsat

“SMM is an ideal platform to engage in discussion with the industry about how best to navigate the changing world of maritime communications,” said Jan Michelsen, VP, Maritime Business Development, Cobham SATCOM. “By bringing together some of the world’s leading experts in this field, we plan to provide real insight into both the challenges of running a vessel efficiently in today’s highly regulated climate and the solutions that Cobham and our industry partners can provide to assist.”
