Fischer Panda UK Announces New Portable Power Solutions to the Commercial Vehicle Market

Commercial Vehicle Show, 23 – 25 April 2024, NEC Birmingham, Stand 5E92

Leading provider of high-quality vehicle power solutions, Fischer Panda UK, is delighted to have teamed up with Clayton Power to offer a range of innovative on-the-go power solutions for the first time at this year's show. Visitors to the newly branded Fischer Panda UK stand have the opportunity to explore the All-in-One Lithium Power Supply units which offer a powerful

and versatile solution for a host of vehicle applications and needs.

Designed for user convenience with a focus on efficiency and versatility, these units are set to elevate mobile and off-grid power systems requiring small to medium levels of onboard portable power. The LPS II offers a semi fixed, hassle-free power source for users on the go, without the complexities of additional equipment and full system overhauls.

Sales and Marketing Director, Chris Fower, said: “We’re excited to bring this alternative power option to our range of industry leading power products and showcase them together at the Show this year. We service full system design demands very well and now we’ve expanded our offering to a cost-effective alternative to full system solutions. Our customers can now access a full portfolio of premium power technology solutions; come along and talk to our experts at the Show to discuss your needs.”

As providers of integrated power and HVAC system solutions to the automotive and specialist vehicle sector, Fischer Panda UK will have a full line up of products from leading brand partners such as Mastervolt and Autoclima. There will also be two vehicles on the stand displaying the hybrid system solutions designed and commissioned by Fischer Panda UK’s experienced technical team.

Vehicle refrigeration systems specialist, Hubbard teamed up with Acrobat Vehicle Rentals and vehicle conversion specialist, Paneltex to work with Fischer Panda UK on a collaboration utilising a Mercedes Sprinter fridge van. The van will be on display at the Show, demonstrating a Mastervolt hybrid Li-Ion power and solar system powering a Hubbard refrigeration unit. This application highlights the alternatives in providing power to the vehicle’s onboard systems without the need to keep the vehicle engine running or the need for a fully EV application to meet the power demands.

The longstanding collaboration between Fischer Panda UK and mobile trailer unit specialist, Torton Bodies, has brought the second application to the stand at this year’s Show. This vehicle is based on a community mobile library van, where Fischer Panda UK has integrated a smart, innovative Mastervolt onboard power solution using Li-Ion technology to meet the sustainable power demands of the vehicle.

Come along to the stand to find out more about both these projects, our

products and our hybrid system designs with one of our experienced vehicle specialists at the Show.

About Fischer Panda UK

Fischer Panda UK Ltd offers full-system design capability, servicing and aftercare as a leading distributor of diesel generators, air-conditioning systems, hybrid electric solutions and integrated mobile power solutions for a variety of commercial and specialist application vehicles.

Renowned worldwide as innovative, reliable and extremely quiet, the extensive Fischer Panda range of compact diesel generators includes its next generation highly efficient and powerful variable speed iSeries-Generators. Other world-class products from Fischer Panda UK include mobile power solutions from Clayton Power and working as the sole UK automotive distributor for Mastervolt and a wide range of refrigeration and air conditioning solutions as the UK exclusive distributor for Autoclima.

Fischer Panda UK was among the first companies to achieve ISO UKAS 9000:2015 accreditation and operates from a purpose built 9,000 sq. ft facility in Verwood, Dorset.

Active in the military and automotive sectors, the company works with UK MOD and other military units around the world providing solutions for specialist vehicle and land-based applications. Two thirds of Formula 1 mobile truck units install Fischer Panda generators, as do the BBC, Sky and many other mobile broadcasting vehicles.

Operating since 1977, Fischer Panda GmbH is headquartered in Paderborn, Germany. The Fischer Panda team covers more than 500 technicians and partners in over 90 countries worldwide.
