

Visitors to this year's Crick Boat Show can view and test a range of systems at the Fischer Panda UK display trailer

May 16, 2022 09:00 BST

Fischer Panda UK Brings Unique Live Demos to Crick

Crick Boat Show, 2nd to 5th June, Stand Q37

The distinct Fischer Panda UK display trailer is set to stand out as one of the main on-land features at this year's Crick Boat Show when it offers visitors the unique opportunity to experience live demonstrations of the latest technology.

The complete systems integrator will welcome people onboard its bespoke

demo-trailer where they can see, hear and operate Fischer Panda UK's quiet and efficient solutions. Equipment on display includes its compact AC and DC diesel generators, diesel electric hybrid propulsion, and smart battery management and power electronics systems.

Boat owners will be encouraged to engage and participate in testing the functionality and quiet operation of the systems. The Verwood company's specialists will advise on the most cost-effective and green solutions for specific vessels and applications, and discuss the full-service capabilities for supply, installation and support.

With a high-profile presence at the 2022 show, Fischer Panda UK can demonstrate how its range of customised systems can benefit OEMs and customers in the inland waterways sector, for both newly-built vessels and retro-fitting, and either cruising or live-aboard.

Fischer Panda UK products will also be a prominent feature on the water this year, with systems available to view in-situ, onboard vessels.

Chris Fower, Sales and Marketing Director, Fischer Panda UK, said: "We look forward to offering the most interactive experience available at Crick when we welcome visitors to our trailer on the quayside again. It is the ideal opportunity for people to ask questions and examine the features and operation of the products for themselves.

"As a company, one of our key aims is to work with customers and partners to help them hit their emissions targets and improve their green credentials. Our systems and future technologies, such as electric propulsion and hybrid power systems, are perfect for canal and waterways vessels due to their environmental and efficiency benefits, so we are expecting a busy Crick Boat Show this year with the chance to meet new and regular customers. We appreciate that boat owners want power and propulsion solutions that are reliable, efficient and quiet for independence away from marinas or shore power, plus peace of mind that they are not negatively impacting their beautiful surroundings along the UK's waterways network."

Fischer Panda UK supplies electric and hybrid drive systems in the range from 2 kW to 100 kW, available with voltages ranging from 24V to 360V depending on the power requirements. The company also offers the Fischer Panda Electric Pod Motor, offering a quiet, emission-free propulsion option which

requires minimal maintenance. Its compact gensets include the Panda 4000s Neo and the Panda 5000i Neo, plus the AGT DC generators, ideal for efficiently keeping the batteries well charged.

Tickets for this year's Crick Boat Show are available on the [website](#). The 2022 inland waterways festival includes boat on the water in the marina and on land in the Show Village, chandleries, boatbuilders, marinas, brokerage firms, and food and craft stalls.

Visit Fischer Panda UK at Crick Boat Show on Stand Q37 and see the Fischer Panda UK equipment onboard in the on-water display. Go to www.fischerpanda.co.uk for more information.

About Fischer Panda UK

Fischer Panda UK Ltd offers full-system design capability, servicing and aftercare as a leading distributor of diesel generators and a major supplier of the latest technology in air-conditioning systems, hybrid electric propulsion systems, integrated mobile power solutions and watermakers for a variety of commercial and leisure vessels.

Renowned worldwide as innovative, reliable and extremely quiet, the extensive Fischer Panda range of compact diesel generators includes its next generation highly efficient and powerful variable speed iSeries-Generators. Fischer Panda generators from the Panda 4000s Neo up to the next generation iSeries Panda 45i genset have passed type approval by members of the IACS (International Association of Classification Societies) board.

Other world-class products from Fischer Panda UK include desalination systems from Sea Recovery, HRO, and Village Marine, with models suitable for day-boats to warships and offshore platforms, plus air-conditioning systems from leading marine HVAC supplier Dometic, CZone digital switching and Mastervolt power solutions.

Fischer Panda UK is ISO UKAS 9000/1 accredited and operates from a purpose built 9,000 sq. ft facility in Verwood, Dorset. Its experienced engineers, sales and operational staff work with OEMs to develop integrated systems for custom vessels and offer specialist technical support and on-going aftercare to its customers.

Also active in the military and automotive sectors, the company works with UK MOD and other armies around the world providing solutions for specialist vehicle and land-based applications. Two thirds of Formula 1 mobile truck units install Fischer Panda generators, as do the BBC, Sky and many other mobile broadcasting vehicles.

Operating since 1977, Fischer Panda GmbH is headquartered in Paderborn, Germany. The Fischer Panda team covers more than 500 technicians and partners in over 90 countries worldwide.
