Fischer Panda UK return to the South Coast & Green Tech Boat Show to Showcase Eco-Friendly Power Solution Alternatives

South Coast & Green Tech Boat Show, 19 – 21 April, Ocean Village Marina, Southampton, Stand 23

Highlighting its range of eco-friendly power solutions and products from leading brands, Fischer Panda UK will be returning to the South Coast and

Green Tech Boat Show at Ocean Village Marina in Southampton to showcase their integrated marine systems, with the new addition of Clayton Power's innovative LPS II portable power solution.

The South Coast and Green Tech Boat Show, an event dedicated to boat owners wishing to explore greener options, will showcase the latest green technologies and sustainable solutions from the industry, including Fischer Panda UK's innovative on-the-go power options, hybrid power systems, super-efficient variable speed marine generators and extensive collection of emission-reducing electric hybrid propulsion systems.

Show visitors can explore **Clayton Power's All-in-One Lithium Power Supply** units at Fischer Panda UK's stand, which offer an efficient, powerful and versatile solution for marine applications requiring small to medium levels of onboard portable power. Clayton Power's LPS II range not only prioritises environmental sustainability and user convenience, but also offers a semi fixed, hassle-free onboard power source which when installed, can be charged from the boat's alternator and renewable sources while out at sea to power onboard equipment.

Fischer Panda UK's range of reliable **variable speed iSeries generators** are ideal for those looking for a super-efficient and powerful solution. The generators are HVO-fuel approved and meet demands for more eco-friendly and smarter hybrid systems which can also support the move to electric power.

Along with Fischer Panda's renowned generators, the **ePanda 5kW Electric Motor** will also be on working display, demonstrating Fischer Panda's portfolio of technologically advanced, green propulsion solutions.

Supporting the wider complete systems approach, solutions from **Mastervolt Power Electronics** complement the environmentally friendly offering with their reliable and innovative, autonomous power solutions. Fischer Panda's expert team are on hand to explore options and provide advice for a range of marine applications.

Fischer Panda UK will also display a range of Parker Group Water Makers including the **Parker H2O Eco**,

demonstrating full automation, boasting exceptional low current/ampere performance and efficiency unparalleled in the market. Additionally, this fully automatic water maker offers flexible installation options tailored to the specific application.

“We are looking forward to returning to the South Coast & Green Tech Boat Show, a local exhibition for us to showcase our innovative line up of eco-friendly solutions to the marine market.

In response to the increasing demand from the boating community for sustainable options and greener onboard solutions, this event serves as an opportune platform for us to meet with boat-owners and customers, discuss their unique needs and offer a tailored solution, whilst coming together with the community to raise awareness about lowering emissions and reducing boaters’ carbon footprint.” commented Sales and Marketing Director at Fischer Panda UK, Chris Fower.

About Fischer Panda UK

Fischer Panda UK Ltd offers full-system design capability, servicing and aftercare as a leading distributor of diesel generators, air-conditioning systems, hybrid electric solutions and integrated mobile power solutions for a variety of commercial and specialist application vehicles.

Renowned worldwide as innovative, reliable and extremely quiet, the extensive Fischer Panda range of compact diesel generators includes its next generation highly efficient and powerful variable speed iSeries-Generators. Other world-class products from Fischer Panda UK include mobile power solutions from Clayton Power and working as the sole UK automotive distributor for Mastervolt and a wide range of refrigeration and air conditioning solutions as the UK exclusive distributor for Autoclima.

Fischer Panda UK was among the first companies to achieve ISO UKAS 9000:2015 accreditation and operates from a purpose built 9,000 sq. ft facility in Verwood, Dorset.

Active in the military and automotive sectors, the company works with UK MOD and other military units around the world providing solutions for specialist vehicle and land-based applications. Two thirds of Formula 1 mobile truck units install Fischer Panda generators, as do the BBC, Sky and many other mobile broadcasting vehicles.

Operating since 1977, Fischer Panda GmbH is headquartered in Paderborn, Germany. The Fischer Panda team covers more than 500 technicians and

partners in over 90 countries worldwide.
