Fischer Panda UK Returns to Southampton Boat Show to Showcase Highly Proficient TX Series from Dometic

Southampton International Boat Show, 15th to 24th September, Stand E020

Fischer Panda UK, a leading supplier of marine generators and power systems, is thrilled to announce its participation once again in the Southampton Boat Show 2023, where it will proudly showcase the latest innovation in marine air conditioning power solutions: Dometic's TX Voyager Series.

Fischer Panda UK has strengthened its position as a comprehensive system supplier for the UK retrofit leisure market by introducing the acclaimed Dometic Voyager Series TX self-contained air conditioning unit. This high-efficiency product recently made its debut in the UK leisure boating market earlier this year.

The technology employed in the speed management of the Dometic Voyager Series TX facilitates a notable decrease in power consumption, approximately 40% lower than that of comparable air conditioning units. This attribute positions it as one of the most exceptionally efficient systems available in the current market. This breakthrough is accomplished through intelligent compressor speed regulation aligned with the vessel's demands. Once temperature targets are achieved, the speed is intelligently lowered, achieving heightened efficiency and a notably quieter operation. This all-inclusive unit features variable-speed air conditioning and serves as an integrated solution, delivering both air conditioning and heating functionalities to vessels.

"We are thrilled to return to our local boat show at Mayflower Park to showcase Dometic's TX Voyager Series at this year's Southampton Boat Show," said Chris Fower, Sales & Marketing Director of Fischer Panda UK. "These AC units embody the next generation of marine air con technology, and we are proud to offer our customers access to such advanced solutions. The TX series from leading brand, Dometic allows Fischer Panda UK to introduce a robust, effective air conditioning unit as part of our collection of high-performing, hybrid system solutions. Our team is looking forward to engaging with visitors, answering their questions, and demonstrating the unique features and benefits of the TX Voyager Series."

Fischer Panda UK's participation at the Southampton Boat Show is a testament to their commitment in bringing the latest and most innovative solutions to the marine industry. With decades of experience in the field, Fischer Panda UK has earned a reputation for delivering top-quality products and exceptional customer service.

About Fischer Panda UK

Fischer Panda UK Ltd offers full-system design capability, servicing and aftercare as a leading distributor of diesel generators and a major supplier of the latest technology in air-conditioning systems, hybrid electric propulsion systems, integrated mobile power solutions and water makers for a variety of commercial and leisure vessels.

Renowned worldwide as innovative, reliable and extremely quiet, the extensive Fischer Panda range of compact diesel generators includes its next generation highly efficient and powerful variable speed iSeries-Generators. Fischer Panda generators from the Panda 4000s Neo up to the next generation iSeries Panda 45i genset have passed type approval by members of the IACS (International Association of Classification Societies) board.

Other world-class products from Fischer Panda UK include desalination systems from Sea Recovery, HRO, and Village Marine, with models suitable for day-boats to warships and offshore platforms, plus air-conditioning systems from leading marine HVAC supplier Dometic, CZone digital switching and Mastervolt power solutions.

Fischer Panda UK is ISO UKAS 9000/1 accredited and operates from a purpose built 9,000 sq. ft facility in Verwood, Dorset. Its experienced engineers, sales and operational staff work with OEMs to develop integrated systems for custom vessels and offer specialist technical support and on-going aftercare to its customers.

Also active in the military and automotive sectors, the company works with UK MOD and other armies around the world providing solutions for specialist vehicle and land-based applications. Two thirds of Formula 1 mobile truck units install Fischer Panda generators, as do the BBC, Sky and many other mobile broadcasting vehicles.

Operating since 1977, Fischer Panda GmbH is headquartered in Paderborn, Germany. The Fischer Panda team covers more than 500 technicians and partners in over 90 countries worldwide.
