

H2O PRO Reverse Osmosis System

Sep 11, 2023 07:00 BST

Fischer Panda UK Showcases Parker's Cutting Edge Water Purification Systems at DSEI Show

Fischer Panda UK, a leading distributor of military products will be introducing Parker Portable Military Products for the first time at the DSEI 2023 exhibition as exclusive distributor of the product range across the EMEA region. At the event, Fischer Panda UK will proudly display Parker's innovative range of Military products, including the WJC-30 Freshwater Filtration System, H2O PRO Reverse Osmosis System, and FJC Diesel Fuel Filtration System.

The **WJC-30 Freshwater Filtration System** is a portable system, weighing only 11.3 kg, is capable of producing 114 litres per hour of pure drinking water from virtually any freshwater source. Its standard Jerry Can size allows easy integration with military vehicles, making it a game-changer for mobile military units. The WJC-30 is also a valuable asset in disaster relief scenarios with its ability to deliver high flow rates whilst using low power.

Designed for forward operating groups and scenarios where fuel quality is uncertain, the **FJC Diesel Fuel Filtration System** can quickly clean diesel fuel at a rate of 9 gallons per minute. Its efficiency and reliability make it an indispensable tool for military units operating in challenging environments.

The H2O PRO Reverse Osmosis System is a fully approved water purification solution, already in service with the US Marine Corps. It can transform various water sources, including saltwater, into pure drinking water. With a production rate of 94 litres (25 US gallons) per hour, the system operates on minimal power, utilising either 12v or 24v systems and is suitable for both military platoons and disaster relief efforts.

The H2O PRO system's excellence has been validated through several years of rigorous testing by US forces before its acceptance into the US Marine Corps. The system is now fully approved and has a National Stock Number (NSN). While the NSN certification for the WJC-30 and FJC systems is pending, the UK Ministry of Defence has already acquired one each of the H2O PRO and WJC-30 for testing and assessment.

Barry Fower, Managing Director of Fischer Panda UK, expressed the company's pride in being entrusted as exclusive EMEA distributor for Parker's innovative products, he stated; "Fischer Panda UK's long-standing partnership with Parker as a marine water maker distributor for over 20 years has solidified our technical expertise and reputation.

Currently, we are the only distributor to handle all Parker's water maker brands in both the leisure and commercial markets and being already well established in the military market, it was a natural move to extend this to Portable Military Products. It's testament to the high regard Fischer Panda UK holds among our suppliers and speaks volumes about the quality of our team."

Fischer Panda will have an expert team on hand at the show, visit Stand H5 -

340 for more information about Fischer Panda UK's range of products, or go to www.fischerpanda.co.uk.

About Fischer Panda UK

Fischer Panda UK Ltd offers full-system design capability, servicing and aftercare as a leading distributor of diesel generators, air-conditioning

systems, hybrid electric solutions and integrated mobile power solutions for a variety of commercial and specialist application vehicles.

Renowned worldwide as innovative, reliable and extremely quiet, the extensive Fischer Panda range of compact diesel generators includes its next generation highly efficient and powerful variable speed iSeries-Generators. Other world-class products from Fischer Panda UK include mobile power solutions working as the sole UK automotive distributor for Mastervolt and a wide range of refrigeration and air conditioning solutions as the UK exclusive distributor for Autoclima.

Fischer Panda UK was among the first companies to achieve ISO UKAS 9000:2015 accreditation and operates from a purpose built 9,000 sq. ft facility in Verwood, Dorset.

Active in the military and automotive sectors, the company works with UK MOD and other military units around the world providing solutions for specialist vehicle and land-based applications. Two thirds of Formula 1 mobile truck units install Fischer Panda generators, as do the BBC, Sky and many other mobile broadcasting vehicles.

Operating since 1977, Fischer Panda GmbH is headquartered in Paderborn, Germany. The Fischer Panda team covers more than 500 technicians and partners in over 90 countries worldwide.
