Fischer Panda UK's Hybrid Solutions showcases Highly Efficient TX Series from Dometic at The South Coast and Green Tech Boat Show

Fischer Panda UK will be showcasing the award winning and highly efficient Dometic Voyager Series TX self contained air conditioning unit which is coming to the UK leisure boating market later this year and will be previewing at the South Coast and Green Tech Show.

Enhancing Fischer Panda UK's offering as a complete system supplier of low energy and maximum efficiency systems for the UK retrofit leisure market, the technology around the speed management of the Dometic Voyager Series TX enables a reduction in the power draw by around 40% compared to other air conditioning units, making it one of the most efficient systems on the market.

This innovation is achieved by regulating the compressor speed according to the needs of the vessel, where once temperature requirements have been met, the speed is reduced thus resulting in a more efficient and quieter operation. This unit offers variable speed air conditioning and is an integrated unit supplying both air conditioning and heating to vessels.

“Traditionally air conditioning units have always been one of the onboard systems demanding the highest power draws on leisure boats and, with this new product from Dometic, we're turning this concept on its head with technology that allows a smarter and more efficient approach to power systems on leisure vessels. The TX series from a leading brand, Dometic, allows Fischer Panda UK to introduce a robust, effective self contained air conditioning unit among our portfolio of efficient hybrid system solutions,” said Chris Fower, Sales & Marketing Director at Fischer Panda UK.

About Fischer Panda UK

Fischer Panda UK Ltd offers full-system design capability, servicing, and aftercare as a leading distributor of diesel generators, air-conditioning systems, hybrid electric solutions and integrated mobile power solutions for a variety of commercial and specialist application vehicles.

Renowned worldwide as innovative, reliable and extremely quiet, the extensive Fischer Panda range of compact diesel generators includes its next generation highly efficient and powerful variable speed iSeries-Generators. Other world-class products from Fischer Panda UK include mobile power solutions working as the sole UK automotive distributor for Mastervolt and a wide range of refrigeration and air conditioning solutions as the UK exclusive distributor for Autoclima.

Fischer Panda UK was among the first companies to achieve ISO UKAS 9000:2015 accreditation and operates from a purpose built 9,000 sq. ft facility in Verwood, Dorset.

Active in the military and automotive sectors, the company works with UK MOD and other military units around the world providing solutions for specialist vehicle and land-based applications. Two thirds of Formula 1 mobile truck units install Fischer Panda generators, as do the BBC, Sky and many other mobile broadcasting vehicles.

Operating since 1977, Fischer Panda GmbH is headquartered in Paderborn, Germany. The Fischer Panda team covers more than 500 technicians and partners in over 90 countries worldwide.
