Collaboration between Intellian and OneWeb will bring low latency, high throughput connectivity to multiple markets

Mar 08, 2021 15:00 GMT

Intellian signs \$73 million contract with OneWeb for user terminals

8 March 2021 – Intellian is delighted to announce that it has entered into a US\$73 million contract with low earth orbit (LEO) satellite network provider OneWeb to develop and supply affordable compact user terminals. These innovative, easily-installed antennas will use next-generation technology to provide high bandwidth, low latency connectivity to OneWeb’s global satellite service, delivering to multiple markets including enterprise and government services.

“We’re delighted to collaborate with our trusted partner OneWeb to design and produce this game-changing terminal, which is set to transform satellite communications by delivering cost-effective connectivity and enhanced user experience to multiple markets,” said Eric Sung, CEO, Intellian Technologies. *“This is another significant milestone for Intellian: we believe that innovation and ease of use are key to empowering connectivity, and the work jointly announced today by Intellian and OneWeb is fundamental to our goal to enable a globally connected world.”*

OneWeb is launching a constellation of 648 LEO satellites, which when complete will deliver affordable, fast, high bandwidth and low latency Ku-band connectivity to every corner of the world.

Michele Franci, Chief of System Delivery at OneWeb, said: *“We have a clear ambition to be a leader in the transformation of Space communications technology. We are delighted to continue our work with Intellian to develop a range of User Terminals that meet the needs of our customers in many different sectors including: small, medium and large enterprises; and major vertical sectors such as Enterprise, Maritime and Governments with mission critical applications.”*

The new low cost compact terminals will be unveiled later in the year and are scheduled to become available in 2022.

About Intellian Technologies

Intellian is a leading global technology and solutions provider for satellite

communications, empowering connectivity for the maritime, government, military, energy, cruise and enterprise sectors. Founded in 2004, Intellian is renowned for its innovative design, future-proofed technologies and outstanding customer support, which combined with continued investment in its partners, logistics network, quality control and low environmental impact production facilities make it a trusted enabler within the satellite communications industry. Its bold, pioneering solutions include the award-winning v240MT – the world’s first tri-band, multi-orbit antenna system – and the future-proof NX series antennas, optimized for high performance and low cost of ownership.

Intellian has a worldwide presence with over 400 employees, 10 global offices and five logistics centers on three continents. Intellian Technologies Inc. is listed on the Korean Stock Exchange, KOSDAQ (189300:KS).

About OneWeb

OneWeb will enable connectivity for governments, businesses, and communities. It is implementing a constellation of Low Earth Orbit satellites with a network of global gateway stations and a range of user terminals to provide an affordable, fast, high-bandwidth and low-latency communications service, connected to the IoT future and a pathway to 5G for everyone, everywhere.
