

The platform has received a thorough remodelling to provide the next generation of voyage planning and compliance.

Mar 22, 2021 16:14 GMT

OneOcean announces the next-generation of its Voyage Planning platform.

The new release represents the future of voyage planning where technology enables a holistic approach to improved decision-making.

OneOcean, the international leader in maritime navigation and compliance software, is excited to announce the launch of the new and improved OneOcean platform. The platform has received a thorough remodelling to provide the next generation of voyage planning and compliance.

Four all-important characteristics of the new software offer customers a more robust and personalised experience. These focus on visually integrating data for better decision-making, structuring processes through a fully digital workflow, enhancing decision-making through AI and reducing risk through customisation.

The brand-new platform leverages all the maritime data it has gathered to power a truly intuitive, AI-based voyage planning solution. Its interface has also been conceived to make the platform even easier to use and aspects of a compliant voyage plan are now visible on a single screen. This means officers no longer need to jump back and forth between modules to make changes to a plan.

Decision-makers can now collaborate and see all sections of a voyage plan, allowing them to quickly understand the risks and operations of the upcoming voyage. By unifying workflows, OneOcean now also enables full, end-to-end passage planning, incorporating route generation, weather evaluation, environmental compliance, safety checks, optimisations and scenario evaluation.

OneOcean constantly collaborated with customers during its development to create a solution that was able to meet the needs of users both onboard and ashore. By using defined focal areas and customer partnerships, OneOcean's portfolio is continuing to grow and create an innovative solution which connects ships and shore-side teams.

“Our customers have given feedback that they value an intelligent voyage planning solution, one that can take even more variables into account to generate a passage plan that is accurate, dynamic and configured to meet the unique needs of their company and the specifications of each vessel,” says Martin Taylor, CEO of OneOcean Group. “This solution will provide a big picture view supporting effective decision-making to deliver significant benefits to users both ashore and onboard.”

About OneOcean

OneOcean is the largest single digital solutions company in the maritime industry and the global leader in digital navigation and voyage compliance. The business supports nearly 20,000 vessels in their regulatory and navigational activities, making life easier for ship owners and managers, both onboard and onshore. Its aim is to simplify e-navigation and compliance with the powerful OneOcean platform built for the future while giving onboard and onshore teams the real-time information they need when they need it.
